0 directories, 2 files (2156 Kb)

When you see the screen below, click **Next** then follow the prompts.

Then, when you see the screen below, click **Finish**.

Step 3: Enter your Customer Information:

The blue icon to the right has been installed on your computer's desktop. Double-click this icon.

ClickDialer

Click Dialer: You should now see the Click Dialer. Click the "+" to open the **Log In Information** screen.

After clicking the "+", you should see the screen to the right.

Enter the user's name under **Display Name** (not required).

Contact your VoIP Phone carrier to obtain the required **Customer Information (IP address)** below, then:

Enter your **Login & Auth Login** (usually the same).

Enter your **Password**.

Enter your **SIP Proxy**.

Enter your **Outbound-Proxy**.

Double check your numbers as they must be accurate for your VoIP service to work.

Click the **Save Changes** button.

Step 5: View and Use the Click Dialer:

Congratulations, you are ready to use your new Click Dialer!

Double click the blue icon on your PC desktop.

You will see the basic Click Dialer screen shown on the right.

When you see **READY...** you can start making calls!

Add Ons: (see the expanded screens below)

- + Click the plus sign to go to your **Log In Information**.
- ◇ Click the diamond to expand the screen for **recording, playing pre-recorded messages, using touchtone keys, transferring, and other functions**.

Paper Click the paper icon to see and read your **scripts**.

People Click the people icon to access your private **Address Book**.

Features:

Call You can click to highlight and automatically call a phone number or you can type a phone number in the white box at the top (or click the touchtone keys), then click the **Call** button to dial the number and then the **Hang Up** button to end the call.

Swipe On/Off Check this box when you want to be able to click to highlight any phone number on your computer (on emails, web sites, documents, etc.) to place a call.

Hold Click to place a call on hold.

Menu "Click Right Mouse Button for Menu" This will display various useful functions.

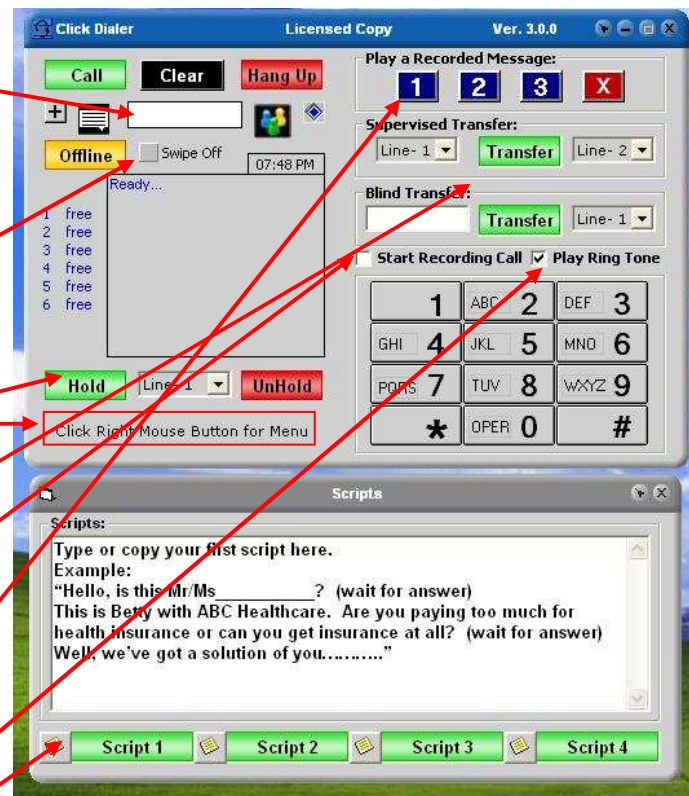

Transfer Calls You can choose to transfer a call or conference a call.

Start Recording Call Click the little white box to **record a conversation** on your hard drive. Click it again to **stop the recording**.

Pre-recorded Messages Click one of the 3 numbers to play your pre-recorded messages on answering machines or voice mail. Click the **X** to stop playing the message.

Play Ring Tone Check this box if you want to hear the ringing of the phone calls.

Scripts You can create 4 different scripts to assist you when talking to people.

You will need a USB or PC headset to make calls.
